## **DETAILED ACTION**

### ***Specification***

1. A substitute specification, including the abstract, in proper idiomatic English and in compliance with 37 CFR 1.52(a) and (b) is required. The substitute specification filed must be accompanied by a statement that it contains no new matter.

### ***Claim Objections***

2. Claims 1 and 2 are objected to because of the following informalities: The claims are grammatically flawed. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Arney et al (6,329,058).

With regard to claim 1, Arney et al teach a manufacturing method to produce polymer chips containing metal oxide nanoparticles (abstract), comprising the steps of: pre-mixing metal oxide nanoparticles with at least one polymer material to generate a composite material containing metal nanoparticles material, drying the mixture (column 9, lines 22-46); and blending and extruding (column 10, lines 39-40) the composite material as well dispersed metal oxide nanoparticle/polymer chips (figure 4, numbers 52, 54, 56 and 58).

With regard to claim 2, Arney et al teach that the metal oxide nanoparticles are dispersed in solution (column 6, lines 26-29).
